

Device Monitoring Specification (Sample)

REQ-001: The system shall emit an audible alarm within 2 seconds when the monitored value drops below the configured threshold.

REQ-002: The audible alarm shall stop automatically once the monitored value returns to or above the configured threshold.

REQ-003: The configured threshold shall be adjustable by an authorised operator between the documented minimum and maximum limits.

Notes: nulla nulla integer; lorem ipsum dolor sit amet. The word nulla appears here for retrieval testing. Thresholds and alarms are safety-relevant.

Limit table:

param	min	max
value	10	990
delay	0	2
